

## Degree Requirements

### Associate of Applied Science Degree

The Associate of Applied Science degree program prepare the students to enter an occupation or a closely related cluster of occupations after two years of full-time study. It is a technical or occupational degree program, which means that most students in the program are learning a specific trade or practical skill which they hope to make their career. Students seeking an Associate of Applied Science Degree must major in an occupational program of study. Most candidates for the Associate of Applied Science degree do not transfer directly into a bachelor's degree program. However, Pittsburg State University, Fort Hays State University, Wichita State University, Kansas State University, and Emporia State University have some specific programs which closely parallel the requirements at Pratt Community College. In particular, Pittsburg State University encourages students in certain technology majors to transfer to it bachelor's degree program in technology. PCC holds certification as an area vocational school so vocational programs consist of courses which are accredited as college level credit but are also recognized as fulfilling the competency-based requirements of vocational training schools.
