### REPEAT ENROLLMENTS IN DEVELOPMENTAL COURSES

The Board of Trustees and administration recognizes the importance of successful completion of developmental courses as a prerequisite for success in selected college level courses, and that such courses do not satisfy graduation requirements nor are these courses transferable to four-year institutions.

For Financial Aid purposes, only 30 attempted remedial credit hours can receive financial assistance. If the student needs to repeat any remedial courses, financial aid can count these courses towards enrollment and award Title IV funds to a student who is repeating, for the first time only (i.e., one repetition per class) a previously passed course. For this purpose, passed means any grade higher than an "F", regardless of any school policy requiring a higher qualitative grade or measure to have been considered to have passed the course.
